Olivia Newton

Welcome to Have Fun Amusement Park training. My name is Olivia Newton and I will be one of your host trainers. My office hours are 8:00am-5:00pm ET.

I am truly glad you chose to join Have Fun Amusement Park. There are a few things we take seriously at Have Fun and they are:

- Fun for our customers
- Safety for our customers and employees

In order for you to accomplish these two tasks, Have Fun Amusement Park developed an online Workplace Safety Training program. In the program, you will be complete a series of web-based courses. Each course will include basic safety criteria for all aspects of your job and "real life" scenarios that will enable you to apply the skills presented. In addition, there will be discussions about these scenarios with other employees. It is important to complete all your assignments on time and to participate in discussions. These scenarios will bring the training to life and will set the stage in the event a similar situation arises while you are on the job.

I have been with Have Fun Amusement Park for six years. I started by providing entertainment to our customers, yes , I was a clown. I had so much entertaining our customers. Eventually, I ran the children's mini-roller coaster and then supervised the employees of the Gotta Have Fun roller coaster. From there I began training our employees in customer service and then moved into supporting the Workplace Safety Training program.

I look forward to supporting you in your safety journey. Remember, I am only a click away.

Mark Pash

Hi there, I am Mark Pash and I will also be one of your host trainers.

First of all, I love this shift, I am a night owl. The reason I work until 2am is to support our west coast employees.

I know Olivia shared information about the workplace safety course with you so let me share my background. I have been with Have Fun Amusement Park for 8 years. I started on the maintenance team maintaining the beautiful gardens. I then moved into the office completing safety reports and following up on each to ensure Have Fun improved in every manner possible so that our customers stay safe while having fun.

With my background in seeing what types of safety issues occurred, I decided to join the training team so that our employees could avoid these types of safety issues.

I look forward to hosting your training and please share your ideas on workplace safety. Have Fun Amusement Park is always looking for ways to improve. Talk to you soon!
